

## Hardness Indenters

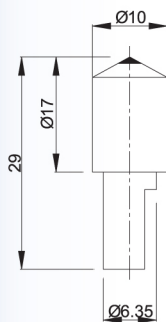

'JDT' produces hardness testing diamond indenters according to the Rockwell & Vickers systems. Error free, exactly formed natural diamonds are super lapped to an exact angle of  $120^\circ$  with incredible microfinish, to achieve high standards of precision and performance.

Hardness Indenters are used in manual and automatic hardness testing equipment. These are tested to give constant reading to hardness of metals.

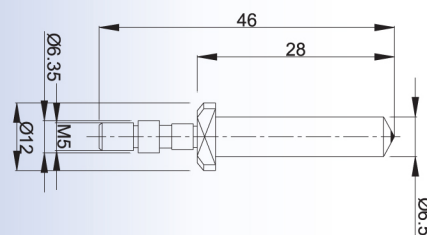

Rockwell Indenter  
0.2 R  $120^\circ$

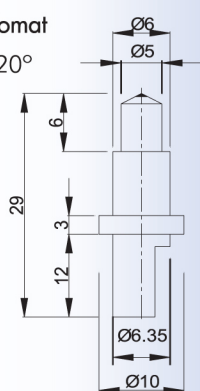

Rockwell Indenter  
0.2 R  $120^\circ$

Reichner Indenter  
0.2 R  $120^\circ$

Tester Automat  
0.2 R  $120^\circ$

Reichner Indenter  
0.2 R  $120^\circ$
